

## Project SEED '12, Stonehill College

We had four Project SEED I students working with us. Ladan Adan (Brockton H.S.) and Joseph Maglio (Oliver Ames H.S.) worked with Louis Liotta. Christina Ball (Wareham H.S.) and Joseph Sirois (Oliver Ames H.S.) worked with Cheryl Schnitzer. Professor Liotta's students studied the synthesis of polyhydroxylated pyrrolidines and pyrrolizidines as inhibitors of glycosidases. Professor Schnitzer's worked on studying CO<sub>2</sub> emissions from soil and leaves. Interestingly, two of the four students are siblings of previous Project SEED students at Stonehill. In fact, Ladan continued the project on which her brother had worked.
